## **Craftsmanship & Materials**

Each print is conceived as a timeless object, where light, material and intention come together in quiet balance.

All works are produced as museum-quality pigment prints using the Canon imagePROGRAF PRO-1100.

Selected baryta and fine art papers from Hahnemühle and Canson are carefully matched to each image.

This process allows for deep blacks, delicate tonal transitions and a refined surface that enhances the presence of each work.

Every piece is released as a unique work (1/1), individually signed and accompanied by a certificate of authenticity. Signed on verso (back of print) and accompanied by a signed Certificate of Authenticity.

Larger formats and bespoke framing options are available on request.

Each print is prepared and finished by the artist, ensuring the highest level of quality and consistency.
